Word of Life Bible Institute <i>wordoflife.edu</i>	Pottersville, NY	\$19,404		

Potential savings are calculated based on four years of college. We take the amount you save as a Freshman by attending WOLBI instead of the school mentioned above and then add in the savings over the next three years with the max potential scholarships associated with each school, resulting in the total underneath Potential Savings. A formula can be followed as (Cost of one year at school X - the cost of one year at Word of Life) + (Max scholarship amount x 3) = Savings. Numbers are approximate and subject to change.
